

KAIZEN

TRAINING FOR SELF-DEVELOPMENT

WHO WE ARE

Based within a multitude of areas across Scotland, Kaizen Training promotes educational experiences for self-development, to achieve both personal and professional goals.

At Kaizen, we're passionate about people. We are a forward-thinking company that teaches and engages audiences to upskill and further their knowledge - enhancing career prospects and confidence.

We are an SQA-approved organisation that uses a mixture of theory and practical interactions to explain procedures and scenarios throughout training to engage our attendees and help them to retain more information.

We are fully compliant with the SSSC, Care Inspectorate and other regulatory bodies with a range of accredited courses and vocational qualifications.

Popular courses include:

- First Aid
- Health & Safety
- Moving & Assistance
- Dementia Care
- Infection Control
- Epilepsy
- Medication
- Adult Support & Protection

We can also, upon request, provide in-depth training on stoma care, palliative and end of life care, PPE/Donning & Doffing and more.

Don't see the training you require in this brochure? Let us know.

Our friendly team are always willing to help.

SVQs

As an SQA-approved SVQ centre, we can provide tailored support and encouragement to help you achieve accredited SVQ qualifications within Health and Social Care, verified from one of our Centres of Excellence across the country.

Upon completion of your SVQ, you will have an internationally recognised qualification that has prepared you with the knowledge and skills to carry out your role confidently and to a high standard. The Health and Social Care SVQ is a mandatory factor for SSSC registration (an SVQ must be gained within 5 years to maintain your registration to work.)

We offer Health and Social Care SVQs at levels 2, 3 and 4. Our level 3 & 4 qualifications offer SAAS funding - speak to a member of our team for more information on funding opportunities. An SVQ can take between 10 weeks to 1 year to complete depending on commitment and level.

Due to observation work being a mandatory factor for satisfactory completion, the SVQs are best suited to your current role. We recommend:

- SVQ level 2 would be suited to: Health Care Assistant/Support Worker
- SVQ level 3 would be suited to: Team Leader/Coordinator
- SVQ level 4 would be suited to: Assistant Manager/Manager

HEALTH AND SOCIAL CARE SVQ PRICE LIST

SVQ 2	£ 999	SVQ 3	£ 1350
SVQ 4	£ 1999	SVQ 3 (L&D)	£ 1999

HEALTHCARE TRAINING

Adult Support & Protection

The Adult Support and Protection (Scotland) Act 2007 is designed to protect those adults who are unable to safeguard their own interests and are at risk of harm because they are affected by disability, mental disorder, illness or infirmity.

Harm means all harm including self-harm and neglect. This training session aims to inform candidates about various safeguarding measures, indicators of harm and how to appropriately and confidently respond to any concerns of an adult in danger.

Dementia Awareness

This session will educate candidates on both the service user and their family members, applying both roleplay and theoretical learning to give a sense of how to best support and interact with them. Understanding the emotional repercussions, including distress, and how to deal with difficult scenarios.

Epilepsy

This course is aimed at those working with or responsible for the well-being and welfare of individuals with epilepsy.

In addition to explaining what to do in the event of a seizure, it provides an advanced level of knowledge on the different forms of epilepsy, its severity/impact, and the causes and triggers of a seizure.

First Aid

We cover the St Andrews First Aid Safety Training and content includes the different emergency procedures and protocol, primary assessment of the situation as well as covering topics including CPR and choking.

HEALTHCARE TRAINING

Food Hygiene

This course covers all aspects of safe food handling to ensure participants have a high level of knowledge and understanding of the existing legislation and best practices of food handling.

Suitable for companies looking for high-quality training and refresher courses, it looks at the importance of personal hygiene when handling food, best cleaning practices, common issues and bacteria relating to food hygiene and much more.

Health & Safety

Through this course, we'll help to improve participants' knowledge of safe working practices, reduce risks in the workplace, and help to create a more compliant and safer work environment.

It provides the most up to date in Health and Safety advice and looks at government legislation and risk assessments.

Infection Control

Our Infection Prevention and Control (IPC) courses are designed to give participants critical knowledge of how to work safely in environments where there may be an increased risk of infections transferring.

Within this course, we will explore the various types of infections and which control measures should be in place to prevent infection to protect yourself and those within your care, as well as what to do in the event of a breach.

HEALTHCARE TRAINING

Medication

Medication is an important part of caring for vulnerable individuals and may include medication prompts, assistance, or administration.

In line with the Health and Social care standards, this informative session will teach participants how to effectively record, dispose of, administer and order medication on a service user's behalf.

Moving & Assistance

This session informs candidates of relevant biomechanics, moving procedures, equipment and how to prevent bodily harm to both you and the individual you are preparing to move.

Moving & Assistance is a participatory course, and each individual will be required to carry out a practical assessment. Your trainer will work on this with candidates until they are fully confident.

Personal Care

This session increases understanding of personal care in health and social care. The course explains how to provide personal care in a safe and hygienic way; including handwashing, use of Personal Protective Equipment (PPE) and disposal of waste.

It also outlines good practice in supporting an individual in various aspects of their personal care and hygiene including washing, dental care and going to the toilet.
